SUMMARY

Backend-focused Software Engineer with strong foundations in Java, Data Structures & Algorithms, Object-Oriented Programming, Operating Systems and Computer Networks. Focused on building scalable backend services, distributed systems and cloud-native applications using Spring Boot, PostgreSQL, Redis, Kafka, Docker and Microsoft Azure. Passionate about designing reliable, high-performance systems through clean architecture, microservices and system design principles.

EDUCATION

Savitribai Phule Pune University

Bachelor of Engineering in Information Technology — CGPA: 9.33/10

Pune, India

2022 – 2026

EXPERIENCE

Backend Developer (Independent Projects)

2025 – Present

Self-Employed

Remote

- Designed and developed production-style backend systems using Java, Spring Boot and PostgreSQL following layered architecture and REST principles.
- Built scalable services using Redis caching, Docker containers and event-driven communication patterns.
- Applied authentication, API documentation, testing, logging and clean code practices while following Git-based development workflows.

Assistant Systems Engineer Trainee (Incoming)

2026

Tata Consultancy Services

India

- Received offer to join Tata Consultancy Services as Assistant Systems Engineer Trainee.
- Preparing through advanced study of Java backend development, distributed systems, cloud computing and system design.

PROJECTS

Distributed URL Shortener | Java, Spring Boot, PostgreSQL, Redis, Docker, Azure

2026

- Built a scalable URL shortening service supporting custom aliases, analytics and expiration policies.
- Reduced database load using Redis caching and optimized indexing strategies.
- Containerized services with Docker and prepared deployment on Microsoft Azure.

Event-Driven E-Commerce Backend | Spring Boot, Kafka, PostgreSQL, Redis, Docker

2026

- Developed microservices for catalog, orders, inventory and payments communicating asynchronously using Apache Kafka.
- Implemented JWT authentication, REST APIs and Redis caching for improved performance.
- Designed database schema and resilient backend workflows using Spring Data JPA.

Distributed Object Storage Service | Java, Spring Boot, Azure Blob Storage, Docker, Kubernetes

2026

- Built a backend service supporting secure file upload, versioning and metadata management.
- Implemented chunked uploads, presigned URLs and role-based authentication.
- Designed cloud-ready deployment architecture using Docker, Kubernetes and Azure services.

TECHNICAL SKILLS

Languages: Java, SQL, C++, Bash

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices

Databases: PostgreSQL, Redis, MySQL

Cloud: Microsoft Azure, Docker, Kubernetes

Messaging: Apache Kafka

Core CS: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS, System Design, Concurrency

Tools: Git, GitHub, Maven, Linux, IntelliJ IDEA, Postman
